

Q. What is domain Name?

Ans. Domain name is nothing but a short name given for account to be created on our <https://xims.com.au>.

It can be any string maximum of 15 characters in length.

String all character will be in Lower Case.

No special characters accepted including space.

You can have numerical value in domain name here.

Using your domain name, we create a subdomain on our **XIMS** portal.

Suppose You have a business name “Xpansion Technologies” then you can choose “xpansion” as domain name.

After successful account creation using this domain name you will receive your XIMS app running at your domain like

<https://xpansion.xims.com.au/>

Some of the Prohibited domain name that our system doesn't accepts.

1. Demo
2. Test
